

WORLD ENVIRONMENTAL DAY

5 June 2023

"BeatPlasticPollution."

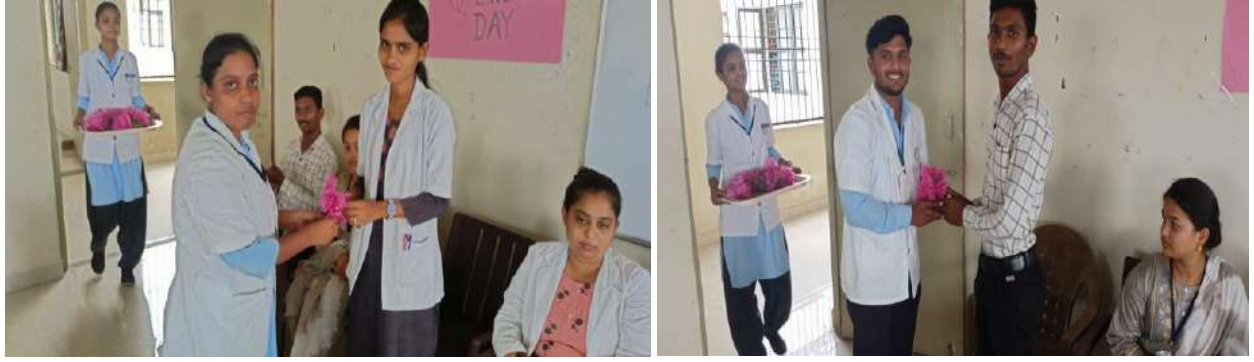

Our environment consists of all the living and non-living elements that surround us and interact with us and each other. Environments evolve to sustain a balanced co-existence. Environmental balance is tipped when one or several elements proliferate beyond control. World Environment Day is celebrated on June 5 2023, every year, across the globe to raise awareness about the need to protect our environment. Below, we will take a look at this year's theme, the history of the day and its significance.

It is observed to raise awareness on the protection and preservation of the environment. World Environment Day is the largest platform that advocates the practice of sustainable development around the world. With the current pace of the overutilization of natural resources, the future generation is likely to be deprived of these resources. Millions of people around the world participate in this program to protect and conserve the environment to fulfill the needs of the future generation.

On the occasion of World Environmental Day which is celebrated from 5/06/2023.
